JOURNAL OF GUIDANCE, CONTROL, AND DYNAMICS
Vol. 34, No. 6, November–December 2011

2011 *Journal of Guidance, Control, and Dynamics* Index

How to Use the Index

In the Subject Index, pages 1941–1947, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 1948–1949, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1950–1955, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2011, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Aeroelasticity and Aeroservoelasticity

G11-041 Improved Computation of Balancing Transformations for Aeroservoelastic Models via Time Scale Conversion
G11-072 Analysis of Flexible Aircraft Dynamics Using Bifurcation Methods
G11-039 Model-Free Control Design for Multi-Input Multi-Output Aeroelastic System Subject to External Disturbance

Aerospace Plane

G11-041 Improved Computation of Balancing Transformations for Aeroservoelastic Models via Time Scale Conversion

Air Transportation

G11-001 Merging of Air Traffic Flows
G11-142 Aircraft Trajectory Optimization and Contrails Avoidance in the Presence of Winds
G11-121 Link Transmission Model for Air Traffic Flow Management
G11-161 Probabilistic Trajectory Prediction and Conflict Detection for Air Traffic Control
G11-134 Joint Metering and Conflict Resolution in Air Traffic Control
G11-068 Time-of-Arrival Taxi Conformance Monitoring for Surface Operations
G11-088 Improved Dynamic Generation of Operationally Acceptable Reroutes Using Network Optimization
G11-124 Runway Operations Optimization in the Presence of Uncertainties
G11-035 Tactical Conflict Detection in Terminal Airspace
G11-075 Feedback Control of the National Airspace System

Collision Avoidance

G11-002 Unmanned Aerial Vehicle Optimal Cooperative Obstacle Avoidance in a Stochastic Dynamic Environment
G11-026 Reactive Collision Avoidance of Using Nonlinear Geometric and Differential Geometric Guidance
G11-016 Trajectory Generation for Aircraft Avoidance Maneuvers Using Online Optimization
G11-087 Accounting for State Uncertainty in Collision Avoidance
G11-134 Joint Metering and Conflict Resolution in Air Traffic Control
G11-104 Conflict Resolution in Converging Air Traffic Using Trajectory Patterns
G11-054 Safe Zone for Closely Spaced Parallel Approaches
G11-035 Tactical Conflict Detection in Terminal Airspace
G11-099 Trajectory Prediction for Light Aircraft

Communication and Air Traffic Control

G11-075 Feedback Control of the National Airspace System
G11-121 Link Transmission Model for Air Traffic Flow Management
G11-161 Probabilistic Trajectory Prediction and Conflict Detection for Air Traffic Control

Flight Mechanics

G11-067 Kinetic State Tracking for a Class of Singularly Perturbed Systems
G11-072 Analysis of Flexible Aircraft Dynamics Using Bifurcation Methods

Flight Operations

G11-104 Conflict Resolution in Converging Air Traffic Using Trajectory Patterns
G11-111 Minimum-Cost Cruise at Constant Altitude of Commercial Aircraft Including Wind Effects

Flow Control

G11-121 Link Transmission Model for Air Traffic Flow Management

Fuels and Fuel Systems

G11-154 Dynamics and Control of Hose-Drogue Refueling Systems During Coupling

General Aviation

G11-089 Investigation of Practical Flight Envelope Protection Systems for Small Aircraft

Landing Dynamics

G11-081 Dynamic Systems Approach to the Lander Descent Problem

Micro Air Vehicles

G11-061 Longitudinal Flight Dynamics of Bio-inspired Ornithopter Considering Fluid–Structure Interaction
G11-127 Ornithopter Control with Periodic Infinite Horizon Controllers
G11-015 Dynamics and Control of a Biomimetic Vehicle Using Biased Wingbeat Forcing Functions
G11-056 Analysis of Insect-Inspired Wingstroke Kinematic Perturbations for Longitudinal Control
G11-130 Modeling Interactions Between Flexible Flapping-Wing Spars, Mechanisms, and Drive Motors

Rotorcraft

G11-103 Kinematic Analysis and Control Design for a Nonplanar Multirotor Vehicle
G11-102 Control Evaluations of Semiactive Fluid-Elastomeric Helicopter Lag Damper

Safety

G11-005 Susceptibility of F/A-18 Flight Controllers to the Falling-Leaf Mode: Nonlinear Analysis
G11-147 Adaptive Detection of Sensor Uncertainties and Failures
G11-004 Susceptibility of F/A-18 Flight Controllers to the Falling-Leaf Mode: Linear Analysis
G11-054 Safe Zone for Closely Spaced Parallel Approaches
G11-035 Tactical Conflict Detection in Terminal Airspace

Testing, Flight, and Ground

G11-097 Flight Control Experiment of Multipurpose-Aviation-Laboratory-alpha In-Flight Simulator
G11-053 Theory and Flight-Test Validation of a Concurrent-Learning Adaptive Controller

Uninhabited and Unmanned Air Vehicles

G11-092 Wind Field Estimation for Small Unmanned Aerial Vehicles

G11-022 Negative-g Trajectory Generation Using Quaternion-Based Inverse Dynamics
G11-048 Constrained Relative Attitude Determination for Two-Vehicle Formations
G11-091 Energy-Based Long-Range Path Planning for Soaring-Capable Unmanned Aerial Vehicles

Vibration

G11-102 Control Evaluations of Semiactive Fluid-Elastomeric Helicopter Lag Damper

COMPUTING, INFORMATION, AND COMMUNICATION

Air Traffic Control Systems

G11-068 Time-of-Arrival Taxi Conformance Monitoring for Surface Operations
G11-109 Automating the Process of Terminal Area Node-Link Model Generation
G11-001 Merging of Air Traffic Flows

Avionics Systems

G11-054 Safe Zone for Closely Spaced Parallel Approaches

Distributed Systems and Networking

G11-013 Multivehicle Coordination in an Estimated Time-Varying Flowfield

ENERGY

Wind Power

G11-152 Modeling Kite Flight Dynamics Using a Multibody Reduction Approach

FLIGHT SIMULATOR SYSTEMS

Guidance, Navigation, and Control Systems

G11-144 Generalized Nonlinear Complementary Attitude Filter
G11-002 Unmanned Aerial Vehicle Optimal Cooperative Obstacle Avoidance in a Stochastic Dynamic Environment
G11-030 Lyapunov Differential Equation Approach to Elliptical Orbital Rendezvous with Constrained Controls

GUIDANCE, CONTROL, AND DYNAMICS TECHNOLOGY

Aircraft Dynamics

G11-067 Kinetic State Tracking for a Class of Singularly Perturbed Systems
G11-004 Susceptibility of F/A-18 Flight Controllers to the Falling-Leaf Mode: Linear Analysis
G11-005 Susceptibility of F/A-18 Flight Controllers to the Falling-Leaf Mode: Nonlinear Analysis

Aircraft Guidance

G11-046 Line-of-Sight Interceptor Guidance for Defending an Aircraft
G11-172 Autonomous Three-Dimensional Formation Flight for a Swarm of Unmanned Aerial Vehicles
G11-173 Efficient Model Predictive Control for Aircraft
G11-026 Reactive Collision Avoidance of Using Nonlinear Geometric and Differential Geometric Guidance
G11-051 Engagement Tactics for Two Missiles Against an Optimally Maneuvering Aircraft
G11-141 Stochastic Approach to Robust Flight Control Design Using Hierarchy-Structured Dynamic Inversion
G11-149 Disturbance Rejection and Robust Least-Squares Control Allocation in Flight Control System
G11-070 Explicit Frequency-Shaped Coning Algorithms For Pseudoconing Environments
G11-052 Family of Local Solutions in a Missile-Aircraft Differential Game

Aircraft Stability and Control

G11-178 Globally Asymptotic Stabilization of Spacecraft with Simple Saturated Proportional-Derivative Control
G11-004 Susceptibility of F/A-18 Flight Controllers to the Falling-Leaf Mode: Linear Analysis
G11-141 Stochastic Approach to Robust Flight Control Design Using Hierarchy-Structured Dynamic Inversion
G11-127 Ornithopter Control with Periodic Infinite Horizon Controllers
G11-173 Efficient Model Predictive Control for Aircraft
G11-097 Flight Control Experiment of Multipurpose-Aviation-Laboratory-alpha In-Flight Simulator
G11-144 Generalized Nonlinear Complementary Attitude Filter
G11-133 Multivariable Adaptive Control of NASA Generic Transport Aircraft Model with Damage
G11-061 Longitudinal Flight Dynamics of Bioinspired Ornithopter Considering Fluid–Structure Interaction
G11-105 Stability Properties and Cross-Coupling Performance of the Control Allocation Scheme CAPIO
G11-086 Derivative-Free Model Reference Adaptive Control
G11-119 Experimental Validation of L_1 Adaptive Control: The Rohrs Counterexample in Flight
G11-137 Takagi–Sugeno Fuzzy Model-Based Flight Control and Failure Stabilization
G11-056 Analysis of Insect-Inspired Wingstroke Kinematic Perturbations for Longitudinal Control
G11-094 Gain Scheduling with Guardian Maps for Longitudinal Flight Control
G11-003 Reference Management for Fault-Tolerant Model Predictive Control
G11-057 Gain Scheduled Control: Switched Polytopic System Approach

Artificial Intelligence

G11-090 Artificial-Immune-System-Based Aircraft Failure Evaluation over Extended Flight Envelope

Astrodynamics

G11-018 Analytical Expressions that Characterize Propellantless Capture with Electrostatically Charged Spacecraft
G11-044 Spectral Decomposition of Orbital Tori
G11-007 Automated Generation of Symmetric Lunar Free-Return Trajectories
G11-025 Using Edelbaum's Method to Compute Low-Thrust Transfers with Earth-Shadow Eclipses
G11-023 Canonical Solution of Two-Point Boundary-Value Problems
G11-151 Novel Nonlinear Rendezvous Guidance Scheme Under Constraints on Thrust Direction
G11-168 Displaced Geostationary Orbit Design Using Hybrid Sail Propulsion
G11-176 Enhancing Lambert Targeting Methods to Accommodate 180 Degree Orbital Transfers
G11-148 Orbital Dynamics of "Smart-Dust" Devices with Solar Radiation Pressure and Drag
G11-010 Improved Shaping Approach to the Preliminary Design of Low-Thrust Trajectories
G11-167 Gaussian Sum Filters for Space Surveillance: Theory and Simulations
G11-083 Solution Based on Dynamical Approach for Multiple-Revolution Lambert Problem
G11-096 Optimal Formation Design for Magnetospheric Multiscale Mission Using Differential Orbital Elements
G11-113 Quantitative Performance for Spacecraft Rendezvous Trajectory Safety
G11-055 Experimental Verification of Periodic Libration of Tethered Satellite System in Elliptic Orbit
G11-060 Survey of Highly Non-Keplerian Orbits with Low-Thrust Propulsion
G11-074 Orbital Targeting Using Reduced Eccentric Anomaly Low-Thrust Coefficients
G11-080 Orbit Determination with Improved Covariance Fidelity, Including Sensor Measurement Biases
G11-117 Absolute Orbit and Gravity Determination Using Relative Position Measurements Between Two Satellites
G11-165 Small-Body Postrendezvous Characterization via Slow Hyperbolic Flybys
G11-129 Stability of Electrodynamic Tethers in a Three-Body System
G11-031 Nonlinear Charge Control for a Collinear Fixed-Shape Three-Craft Equilibrium
G11-081 Dynamic Systems Approach to the Lander Descent Problem
G11-084 Solar Sail Capabilities to Reach Elliptic Rectilinear Orbits
G11-101 Perturbation Theory for Hamilton's Principal Function
G11-143 Static Solutions of the Hamilton–Jacobi–Bellman Equation for Circular Orbit Transfers
G11-019 Coulomb Control of Nonequilibrium Fixed Shape Triangular Three-Vehicle Cluster
G11-059 Evolution of Periodic Orbits in the Sun–Mars System
G11-073 Rock-Around Orbits
G11-079 Targeting Ballistic Lunar Capture Trajectories Using Periodic Orbits
G11-150 Optimal Low-Thrust Invariant Manifold Trajectories via Attainable Sets
G11-155 Optimal Control Problem for Low-Thrust Multiple Asteroid Tour Missions

Autonomous Vehicles

G11-016 Trajectory Generation for Aircraft Avoidance Maneuvers Using Online Optimization
G11-024 Heuristic Pose Estimation of a Passive Target Using a Global Model
G11-092 Wind Field Estimation for Small Unmanned Aerial Vehicles
G11-122 Cooperative Target Localization with a Communication-Aware Unmanned Aircraft System

G11-050 Decentralized Geolocation and Bias Estimation for Uninhabited Aerial Vehicles with Articulating Cameras
G11-091 Energy-Based Long-Range Path Planning for Soaring-Capable Unmanned Aerial Vehicles
G11-066 Autonomous Exploration of a Wind Field with a Gliding Aircraft
G11-022 Negative-g Trajectory Generation Using Quaternion-Based Inverse Dynamics
G11-013 Multivehicle Coordination in an Estimated Time-Varying Flowfield

Avionics Systems

G11-070 Explicit Frequency-Shaped Coning Algorithms For Pseudoconing Environments

Control System Design

G11-053 Theory and Flight-Test Validation of a Concurrent-Learning Adaptive Controller
G11-149 Disturbance Rejection and Robust Least-Squares Control Allocation in Flight Control System
G11-178 Globally Asymptotic Stabilization of Spacecraft with Simple Saturated Proportional-Derivative Control
G11-012 Piloted Simulation Study Comparing Classical, H-Infinity, and Linear Parameter-Varying Control Methods
G11-133 Multivariable Adaptive Control of NASA Generic Transport Aircraft Model with Damage
G11-141 Stochastic Approach to Robust Flight Control Design Using Hierarchy-Structured Dynamic Inversion
G11-127 Ornithopter Control with Periodic Infinite Horizon Controllers
G11-116 Decentralized Robust Adaptive Control for Attitude Synchronization Under Directed Communication Topology
G11-103 Kinematic Analysis and Control Design for a Nonplanar Multirotor Vehicle
G11-089 Investigation of Practical Flight Envelope Protection Systems for Small Aircraft
G11-105 Stability Properties and Cross-Coupling Performance of the Control Allocation Scheme CAPIO
G11-085 Fault-Tolerant Attitude Control for Spacecraft Under Loss of Actuator Effectiveness
G11-107 Feedback Control with Nominal Inputs for Agile Satellites Using Control Moment Gyros
G11-123 Linear Time-Varying Passivity-Based Attitude Control Employing Magnetic and Mechanical Actuation
G11-146 Reconfigurable Spacecraft Controller Design via Location-Scheduled Control
G11-093 Vibration Control Using Input Shaping and Adaptive Positive Position Feedback
G11-031 Nonlinear Charge Control for a Collinear Fixed-Shape Three-Craft Equilibrium
G11-094 Gain Scheduling with Guardian Maps for Longitudinal Flight Control
G11-166 Momentum-Exchange-Impact-Damper-Based Shock Response Control for Planetary Exploration Spacecraft
G11-049 Optimal Rotation Sequences in Presence of Constraints on Admissible Rotation Axes
G11-056 Analysis of Insect-Inspired Wingstroke Kinematic Perturbations for Longitudinal Control
G11-071 Self-Organizing Radial Basis Function Networks for Adaptive Flight Control
G11-039 Model-Free Control Design for Multi-Input Multi-Output Aeroelastic System Subject to External Disturbance
G11-057 Gain Scheduled Control: Switched Polytopic System Approach
G11-009 Passivity-Based Control of Rigid Electrodynamic Tether
G11-008 Robust Roll Autopilot Design for Tactical Missiles
G11-015 Dynamics and Control of a Biomimetic Vehicle Using Biased Wingbeat Forcing Functions
G11-177 Simple Adaptive Control Applications to Large Flexible Structures
G11-175 Attitude Control of a Spacecraft with Single-Gimbal Variable-Speed Control Moment Gyroscope
G11-021 Stability Limits of Spinning Missiles with Attitude Autopilot
G11-135 Robust Control of Flight Simulator Motion Base
G11-139 Linear Parameter Varying Analysis of Switched Controllers for Attitude Control Systems
G11-174 Modified Singular-Direction Avoidance Steering for Control Moment Gyros

Control System Effectors

G11-033 Load Balancing in Control Allocation

Control System Sensors

G11-063 Roll Orientation Estimator for Smart Projectiles Using Thermopile Sensors
G11-163 Risk-Based Sensor Management for Integrated Detection and Estimation

Control Theory

G11-053 Theory and Flight-Test Validation of a Concurrent-Learning Adaptive Controller
G11-020 Density
Functions for Mesh Refinement in Numerical Optimal Control
G11-010 Improved Shaping Approach to the Preliminary Design of Low-Thrust Trajectories
G11-151 Novel Nonlinear Rendezvous Guidance Scheme Under Constraints on Thrust Direction
G11-173 Efficient Model Predictive Control for Aircraft
G11-086 Derivative-Free Model Reference Adaptive Control
G11-097 Flight Control Experiment of Multipurpose-Aviation-Laboratory-alpha In-Flight Simulator
G11-144 Generalized Nonlinear Complementary Attitude Filter
G11-123 Linear Time-Varying Passivity-Based Attitude Control Employing Magnetic and Mechanical Actuation
G11-064 Optimal Nonlinear Feedback Control Design Using a Waypoint Method
G11-112 Globally Stabilizing Proportional-Integral-Derivative Control Laws for Rigid-Body Attitude Tracking
G11-065 Libration Synchronization Control of Clustered Electrodynamic Tether System Using Kuramoto Model
G11-131 Rigid-Body Attitude Tracking with Vector Measurements and Unknown Gyro Bias
G11-125 Constant-Optic-Flow Lunar Landing: Optimality and Guidance
G11-030 Lyapunov Differential Equation Approach to Elliptical Orbital Rendezvous with Constrained Controls
G11-067 Kinetic State Tracking for a Class of Singularly Perturbed Systems
G11-071 Self-Organizing Radial Basis Function Networks for Adaptive Flight Control
G11-028 Precision Attitude Stabilization: Incorporating Rise and Fall Times in Gas-Based Thrusters
G11-057 Gain Scheduled Control: Switched Polytopic System Approach
G11-047 Attitude Stabilization with Unknown Bounded Delay in Feedback Control Implementation
G11-135 Robust Control of Flight Simulator Motion Base
G11-139 Linear Parameter Varying Analysis of Switched Controllers for Attitude Control Systems
G11-177 Simple Adaptive Control Applications to Large Flexible Structures

Differential Games

G11-069 Cooperative Differential Games Strategies for Active Aircraft Protection from a Homing Missile

Dynamics

G11-172 Autonomous Three-Dimensional Formation Flight for a Swarm of Unmanned Aerial Vehicles
G11-130 Modeling Interactions Between Flexible Flapping-Wing Spars, Mechanisms, and Drive Motors
G11-055 Experimental Verification of Periodic Libration of Tethered Satellite System in Elliptic Orbit
G11-154 Dynamics and Control of Hose-Drogue Refueling Systems During Coupling
G11-017 Length Scaling in Spacecraft Dynamics
G11-101 Perturbation Theory for Hamilton's Principal Function
G11-031 Nonlinear Charge Control for a Collinear Fixed-Shape Three-Craft Equilibrium

Engine Control

G11-128 Artificial-Immune-System-Based Detection Scheme for Aircraft Engine Failures

Fault-Tolerant Control

G11-090 Artificial-Immune-System-Based Aircraft Failure Evaluation over Extended Flight Envelope
G11-133 Multivariable Adaptive Control of NASA Generic Transport Aircraft Model with Damage
G11-147 Adaptive Detection of Sensor Uncertainties and Failures
G11-128 Artificial-Immune-System-Based Detection Scheme for Aircraft Engine Failures
G11-137 Takagi–Sugeno Fuzzy Model-Based Flight Control and Failure Stabilization
G11-085 Fault-Tolerant Attitude Control for Spacecraft Under Loss of Actuator Effectiveness
G11-175 Attitude Control of a Spacecraft with Single-Gimbal Variable-Speed Control Moment Gyroscope
G11-003 Reference Management for Fault-Tolerant Model Predictive Control

G11-138 Fault-Tolerant Attitude Control for Flexible Spacecraft Without Angular Velocity Magnitude Measurement

Flight Mechanics

G11-160 Guidance and Control of a Projectile with Reduced Sensor and Actuator Requirements
G11-152 Modeling Kite Flight Dynamics Using a Multibody Reduction Approach
G11-100 Thrusters Pairing Guidelines for Trajectory Corrections of Projectiles
G11-061 Longitudinal Flight Dynamics of Bio-inspired Ornithopter Considering Fluid–Structure Interaction
G11-111 Minimum-Cost Cruise at Constant Altitude of Commercial Aircraft Including Wind Effects

Handling Qualities

G11-012 Piloted Simulation Study Comparing Classical, H-Infinity, and Linear Parameter-Varying Control Methods
G11-094 Gain Scheduling with Guardian Maps for Longitudinal Flight Control
G11-105 Stability Properties and Cross-Coupling Performance of the Control Allocation Scheme CAPIO
G11-171 Cybernetic Approach to Assess Aircraft Handling Qualities

Information Processing

G11-050 Decentralized Geolocation and Bias Estimation for Uninhabited Aerial Vehicles with Articulating Cameras

Intelligent Control

G11-137 Takagi–Sugeno Fuzzy Model-Based Flight Control and Failure Stabilization
G11-086 Derivative-Free Model Reference Adaptive Control
G11-090 Artificial-Immune-System-Based Aircraft Failure Evaluation over Extended Flight Envelope
G11-087 Accounting for State Uncertainty in Collision Avoidance
G11-119 Experimental Validation of L_1 Adaptive Control: The Rohrs Counterexample in Flight
G11-128 Artificial-Immune-System-Based Detection Scheme for Aircraft Engine Failures
G11-013 Multivehicle Coordination in an Estimated Time-Varying Flowfield
G11-071 Self-Organizing Radial Basis Function Networks for Adaptive Flight Control

Launch Vehicle Guidance and Control

G11-149 Disturbance Rejection and Robust Least-Squares Control Allocation in Flight Control System

Missile Dynamics

G11-160 Guidance and Control of a Projectile with Reduced Sensor and Actuator Requirements
G11-045 Kill Vehicle Guidance and Control Sizing For Boost-Phase Intercept

Missile Guidance and Control

G11-036 Optimal Cooperative Pursuit and Evasion Strategies Against a Homing Missile
G11-095 Bounds on the Root-Mean-Square Miss of Radar-Guided Missiles Against Sinusoidal Target Maneuvers
G11-160 Guidance and Control of a Projectile with Reduced Sensor and Actuator Requirements
G11-046 Line-of-Sight Interceptor Guidance for Defending an Aircraft
G11-051 Engagement Tactics for Two Missiles Against an Optimally Maneuvering Aircraft
G11-042 Intercept-Angle Guidance
G11-069 Cooperative Differential Games Strategies for Active Aircraft Protection from a Homing Missile
G11-077 Suboptimal Midcourse Guidance of Interceptors for High-Speed Targets with Alignment Angle Constraint
G11-100 Thrusters Pairing Guidelines for Trajectory Corrections of Projectiles
G11-159 Robust Height Control System Design for Sea-Skimming Missiles
G11-045 Kill Vehicle Guidance and Control Sizing For Boost-Phase Intercept
G11-038 Practical
Stochastic Optimal Guidance Law for Bounded Acceleration Missiles
G11-052 Family of Local Solutions in a Missile-Aircraft Differential Game
G11-158 Proportional Navigation Against Multiple Targets
G11-021 Stability Limits of Spinning Missiles with Attitude Autopilot
G11-008 Robust Roll Autopilot Design for Tactical Missiles

Navigation

G11-153 Autonomous Low-Earth-Orbit Station-Keeping with Electric Propulsion
G11-117 Absolute Orbit and Gravity Determination Using Relative Position Measurements Between Two Satellites
G11-011 Continuous-Time Kalman Filtering with Implicit Discrete Measurement Times
G11-115 Traveling Salesman Problem for a Class of Carrier-Vehicle Systems
G11-070 Explicit Frequency-Shaped Coning Algorithms For Pseudoconing Environments
G11-034 Adaptive Nonlinear Huber-Based Navigation for Rendezvous in Elliptical Orbit
G11-048 Constrained Relative Attitude Determination for Two-Vehicle Formations

Optimization Techniques

G11-005 Susceptibility of F/A-18 Flight Controllers to the Falling-Leaf Mode: Nonlinear Analysis
G11-020 Density Functions for Mesh Refinement in Numerical Optimal Control
G11-016 Trajectory Generation for Aircraft Avoidance Maneuvers Using Online Optimization
G11-142 Aircraft Trajectory Optimization and Contrails Avoidance in the Presence of Winds
G11-140 Using Polynomial Optimization to Solve the Fuel-Optimal Linear Impulsive Rendezvous Problem
G11-163 Risk-Based Sensor Management for Integrated Detection and Estimation
G11-110 Optimal Rendezvous Trajectories of a Controlled Spacecraft and a Tumbling Object
G11-096 Optimal Formation Design for Magnetospheric Multiscale Mission Using Differential Orbital Elements
G11-088 Improved Dynamic Generation of Operationally Acceptable Reroutes Using Network Optimization
G11-051 Engagement Tactics for Two Missiles Against an Optimally Maneuvering Aircraft
G11-058 Costate Approximation and Comparisons Between Improved and Classical Indirect Trajectory Optimization
G11-064 Optimal Nonlinear Feedback Control Design Using a Waypoint Method
G11-052 Family of Local Solutions in a Missile-Aircraft Differential Game
G11-134 Joint Metering and Conflict Resolution in Air Traffic Control
G11-170 Extremum Seeking Based on Atmospheric Turbulence for Aircraft Endurance
G11-003 Reference Management for Fault-Tolerant Model Predictive Control
G11-033 Load Balancing in Control Allocation
G11-043 Fuel Optimization for Continuous-Thrust Orbital Rendezvous with Collision Avoidance Constraint
G11-124 Runway Operations Optimization in the Presence of Uncertainties
G11-150 Optimal Low-Thrust Invariant Manifold Trajectories via Attainable Sets
G11-014 Equitable Aircraft Noise-Abatement Departure Procedures

Pointing Systems

G11-131 Rigid-Body Attitude Tracking with Vector Measurements and Unknown Gyro Bias

Redundancy Management

G11-033 Load Balancing in Control Allocation

Robotics

G11-178 Globally Asymptotic Stabilization of Spacecraft with Simple Saturated Proportional-Derivative Control

Signal Processing

G11-011 Continuous-Time Kalman Filtering with Implicit Discrete Measurement Times
G11-156 Solution Strategies for an Extension of Wahba's Problem to a Spinning Spacecraft

Spacecraft Dynamics

G11-044 Spectral Decomposition of Orbital Tori
G11-040 Dispersion Analysis in Hypersonic Flight During Planetary Entry Using Stochastic Liouville Equation
G11-169 Optimal Lunar Orbit Insertion from a Variable Symmetric Free-Return Trajectory
G11-007 Automated Generation of Symmetric Lunar Free-Return Trajectories
G11-106 Time-Optimal Reorientation of a Spacecraft Using an Inverse Dynamics Optimization Method
G11-162 Integrals of Motion for Planar Multibody Formations with Internal Forces
G11-096 Optimal Formation Design for Magnetospheric Multiscale Mission Using Differential Orbital Elements
G11-055 Experimental Verification of Periodic Libration of Tethered Satellite System in Elliptic Orbit
G11-076 Generation of Optimal Trajectories for Earth Hybrid Pole Sitters
G11-116 Decentralized Robust Adaptive Control for Attitude Synchronization Under Directed Communication Topology
G11-101 Perturbation Theory for Hamilton's Principal Function

G11-129 Stability of Electrodynamic Tethers in a Three-Body System
G11-126 Low-Thrust-Enabled Highly Non-Keplerian Orbits in Support of Future Mars Exploration
G11-017 Length Scaling in Spacecraft Dynamics
G11-082 Ion Beam Shepherd for Contactless Space Debris Removal
G11-065 Libration Synchronization Control of Clustered Electrodynamic Tether System Using Kuramoto Model
G11-139 Linear Parameter Varying Analysis of Switched Controllers for Attitude Control Systems
G11-174 Modified Singular-Direction Avoidance Steering for Control Moment Gyros
G11-019 Coulomb Control of Nonequilibrium Fixed Shape Triangular Three-Vehicle Cluster

Spacecraft Guidance and Control

G11-151 Novel Nonlinear Rendezvous Guidance Scheme Under Constraints on Thrust Direction
G11-176 Enhancing Lambert Targeting Methods to Accommodate 180 Degree Orbital Transfers
G11-023 Canonical Solution of Two-Point Boundary-Value Problems
G11-113 Quantitative Performance for Spacecraft Rendezvous Trajectory Safety
G11-140 Using Polynomial Optimization to Solve the Fuel-Optimal Linear Impulsive Rendezvous Problem
G11-040 Dispersion Analysis in Hypersonic Flight During Planetary Entry Using Stochastic Liouville Equation
G11-110 Optimal Rendezvous Trajectories of a Controlled Spacecraft and a Tumbling Object
G11-098 Approximate Analytical Solutions to Optimal Reconfiguration Problems in Perturbed Satellite Relative Motion
G11-157 Spin-Axis Attitude Determination and Covariances in Local Sun–Earth Frame
G11-107 Feedback Control with Nominal Inputs for Agile Satellites Using Control Moment Gyros
G11-116 Decentralized Robust Adaptive Control for Attitude Synchronization Under Directed Communication Topology
G11-106 Time-Optimal Reorientation of a Spacecraft Using an Inverse Dynamics Optimization Method
G11-083 Solution Based on Dynamical Approach for Multiple-Revolution Lambert Problem
G11-112 Globally Stabilizing Proportional-Integral-Derivative Control Laws for Rigid-Body Attitude Tracking
G11-085 Fault-Tolerant Attitude Control for Spacecraft Under Loss of Actuator Effectiveness
G11-064 Optimal Nonlinear Feedback Control Design Using a Waypoint Method
G11-108 High-Accuracy Trajectory Optimization for a Trans-Earth Lunar Mission
G11-074 Orbital Targeting Using Reduced Eccentric Anomaly Low-Thrust Coefficients
G11-123 Linear Time-Varying Passivity-Based Attitude Control Employing Magnetic and Mechanical Actuation
G11-146 Reconfigurable Spacecraft Controller Design via Location-Scheduled Control
G11-024 Heuristic Pose Estimation of a Passive Target Using a Global Model
G11-078 Time-Efficient Angular Steering Laws for Rigid Satellite
G11-131 Rigid-Body Attitude Tracking with Vector Measurements and Unknown Gyro Bias
G11-125 Constant-Optic-Flow Lunar Landing: Optimality and Guidance
G11-120 Optimal Pulse Strategies for Relative Orbit Transfer Along a Circular Orbit
G11-138 Fault-Tolerant Attitude Control for Flexible Spacecraft Without Angular Velocity Magnitude Measurement
G11-030 Lyapunov Differential Equation Approach to Elliptical Orbital Rendezvous with Constrained Controls
G11-062 Approach Guidance with Double-Line-of-Sight Measuring Navigation Constraint for Autonomous Rendezvous
G11-065 Libration Synchronization Control of Clustered Electrodynamic Tether System Using Kuramoto Model
G11-143 Static Solutions of the Hamilton–Jacobi–Bellman Equation for Circular Orbit Transfers
G11-049 Optimal Rotation Sequences in Presence of Constraints on Admissible Rotation Axes
G11-047 Attitude Stabilization with Unknown Bounded Delay in Feedback Control Implementation
G11-029 Hypersonic State Estimation Using the Frobenius–Perron Operator
G11-027 Analytic Development of a Reference Trajectory for Skip Entry
G11-043 Fuel Optimization for Continuous-Thrust Orbital Rendezvous with Collision Avoidance Constraint
G11-034 Adaptive Nonlinear Huber-Based Navigation for Rendezvous in Elliptical Orbit
G11-175 Attitude Control of a Spacecraft with Single-Gimbal Variable-Speed Control Moment Gyroscope
G11-019 Coulomb Control of Nonequilibrium Fixed Shape Triangular Three-Vehicle Cluster
G11-028 Precision Attitude Stabilization: Incorporating Rise and Fall Times in Gas-Based Thrusters
G11-145 Optimal Glideslope Guidance for Spacecraft Rendezvous
G11-153 Autonomous Low-Earth-Orbit Station-Keeping with Electric Propulsion
G11-174 Modified Singular-Direction Avoidance Steering for Control Moment Gyros

State Estimation

G11-167 Gaussian Sum Filters for Space Surveillance: Theory and Simulations
G11-163 Risk-Based Sensor Management for Integrated Detection and Estimation
G11-164 In-Orbit Estimation of Inertia and Momentum-Actuator Alignment Parameters
G11-011 Continuous-Time Kalman Filtering with Implicit Discrete Measurement Times
G11-092 Wind Field Estimation for Small Unmanned Aerial Vehicles
G11-099 Trajectory Prediction for Light Aircraft
G11-080 Orbit Determination with Improved Covariance Fidelity, Including Sensor Measurement Biases
G11-117 Absolute Orbit and Gravity Determination Using Relative Position Measurements Between Two Satellites
G11-050 Decentralized Geolocation and Bias Estimation for Uninhabited Aerial Vehicles with Articulating Cameras
G11-029 Hypersonic State Estimation Using the Frobenius–Perron Operator
G11-063 Roll Orientation Estimator for Smart Projectiles Using Thermopile Sensors
G11-045 Kill Vehicle Guidance and Control Sizing For Boost-Phase Intercept
G11-034 Adaptive Nonlinear Huber-Based Navigation for Rendezvous in Elliptical Orbit
G11-032 Sparse Gauss–Hermite Quadrature Filter with Application to Spacecraft Attitude Estimation

Structural Control

G11-102 Control Evaluations of Semiactive Fluid-Elastomeric Helicopter Lag Damper

System Identification

G11-037 Parameter Estimation of Aircraft Dynamics via Unscented Smoother with Expectation-Maximization Algorithm
G11-006 Identification of Multimodal Pilot Models Using Ramp Target and Multisine Disturbance Signals
G11-171 Cybernetic Approach to Assess Aircraft Handling Qualities
G11-152 Modeling Kite Flight Dynamics Using a Multibody Reduction Approach
G11-147 Adaptive Detection of Sensor Uncertainties and Failures
G11-164 In-Orbit Estimation of Inertia and Momentum-Actuator Alignment Parameters
G11-136 Modeling Wide-Frequency-Range Pilot Equalization for Control of Aircraft Pitch Dynamics

Trajectory Optimization

G11-020 Density Functions for Mesh Refinement in Numerical Optimal Control
G11-169 Optimal Lunar Orbit Insertion from a Variable Symmetric Free-Return Trajectory
G11-025 Using Edelbaum's Method to Compute Low-Thrust Transfers with Earth-Shadow Eclipses
G11-001 Merging of Air Traffic Flows
G11-140 Using Polynomial Optimization to Solve the Fuel-Optimal Linear Impulsive Rendezvous Problem
G11-010 Improved Shaping Approach to the Preliminary Design of Low-Thrust Trajectories
G11-168 Displaced Geostationary Orbit Design Using Hybrid Sail Propulsion
G11-110 Optimal Rendezvous Trajectories of a Controlled Spacecraft and a Tumbling Object
G11-098 Approximate Analytical Solutions to Optimal Reconfiguration Problems in Perturbed Satellite Relative Motion
G11-111 Minimum-Cost Cruise at Constant Altitude of Commercial Aircraft Including Wind Effects
G11-115 Traveling Salesman Problem for a Class of Carrier-Vehicle Systems
G11-104 Conflict Resolution in Converging Air Traffic Using Trajectory Patterns
G11-106 Time-Optimal Reorientation of a Spacecraft Using an Inverse Dynamics Optimization Method
G11-076 Generation of Optimal Trajectories for Earth Hybrid Pole Sitters
G11-108 High-Accuracy Trajectory Optimization for a Trans-Earth Lunar Mission
G11-074 Orbital Targeting Using Reduced Eccentric Anomaly Low-Thrust Coefficients

G11-066 Autonomous Exploration of a Wind Field with a Gliding Aircraft
G11-122 Cooperative Target Localization with a Communication-Aware Unmanned Aircraft System
G11-058 Costate Approximation and Comparisons Between Improved and Classical Indirect Trajectory Optimization
G11-100 Thrusters Pairing Guidelines for Trajectory Corrections of Projectiles
G11-091 Energy-Based Long-Range Path Planning for Soaring-Capable Unmanned Aerial Vehicles
G11-143 Static Solutions of the Hamilton–Jacobi–Bellman Equation for Circular Orbit Transfers
G11-022 Negative-g Trajectory Generation Using Quaternion-Based Inverse Dynamics
G11-043 Fuel Optimization for Continuous-Thrust Orbital Rendezvous with Collision Avoidance Constraint
G11-077 Suboptimal Midcourse Guidance of Interceptors for High-Speed Targets with Alignment Angle Constraint
G11-155 Optimal Control Problem for Low-Thrust Multiple Asteroid Tour Missions
G11-014 Equitable Aircraft Noise-Abatement Departure Procedures

Unmanned Air Vehicles

G11-002 Unmanned Aerial Vehicle Optimal Cooperative Obstacle Avoidance in a Stochastic Dynamic Environment
G11-026 Reactive Collision Avoidance of Using Nonlinear Geometric and Differential Geometric Guidance
G11-103 Kinematic Analysis and Control Design for a Nonplanar Multirotor Vehicle
G11-154 Dynamics and Control of Hose-Drogue Refueling Systems During Coupling
G11-172 Autonomous Three-Dimensional Formation Flight for a Swarm of Unmanned Aerial Vehicles
G11-066 Autonomous Exploration of a Wind Field with a Gliding Aircraft
G11-119 Experimental Validation of L_1 Adaptive Control: The Rohrs Counterexample in Flight
G11-122 Cooperative Target Localization with a Communication-Aware Unmanned Aircraft System

INTERDISCIPLINARY TOPICS

Analytical and Numerical Methods

G11-058 Costate Approximation and Comparisons Between Improved and Classical Indirect Trajectory Optimization
G11-088 Improved Dynamic Generation of Operationally Acceptable Reroutes Using Network Optimization
G11-148 Orbital Dynamics of "Smart-Dust" Devices with Solar Radiation Pressure and Drag

Environmental Effects

G11-014 Equitable Aircraft Noise-Abatement Departure Procedures
G11-142 Aircraft Trajectory Optimization and Contrails Avoidance in the Presence of Winds

Human Factors

G11-136 Modeling Wide-Frequency-Range Pilot Equalization for Control of Aircraft Pitch Dynamics
G11-006 Identification of Multimodal Pilot Models Using Ramp Target and Multisine Disturbance Signals

PROPULSION

Advanced Space Propulsion

G11-009 Passivity-Based Control of Rigid Electrodynamic Tether
G11-114 Ion Beam Shepherd for Asteroid Deflection
G11-168 Displaced Geostationary Orbit Design Using Hybrid Sail Propulsion

Electric Propulsion

G11-082 Ion Beam Shepherd for Contactless Space Debris Removal
G11-153 Autonomous Low-Earth-Orbit Station-Keeping with Electric Propulsion
G11-114 Ion Beam Shepherd for Asteroid Deflection

REAL-TIME SYSTEMS

Robotic Systems

G11-135 Robust Control of Flight Simulator Motion Base

Sensor Systems

G11-063 Roll Orientation Estimator for Smart Projectiles Using Thermopile Sensors

Signal Processing

G11-032 Sparse Gauss–Hermite Quadrature Filter with Application to Spacecraft Attitude Estimation

SPACE TECHNOLOGY

Landers

G11-081 Dynamic Systems Approach to the Lander Descent Problem
G11-166 Momentum-Exchange-Impact-Damper-Based Shock Response Control for Planetary Exploration Spacecraft
G11-125 Constant-Optic-Flow Lunar Landing: Optimality and Guidance

Mission Design and Analysis

G11-040 Dispersion Analysis in Hypersonic Flight During Planetary Entry Using Stochastic Liouville Equation
G11-118 Applications of V-Infinity Leveraging Maneuvers to Endgame Strategies for Planetary Moon Orbiters
G11-132 Interplanetary Trajectories for Multiple Satellite-Aided Capture at Jupiter
G11-157 Spin-Axis Attitude Determination and Covariances in Local Sun–Earth Frame
G11-162 Integrals of Motion for Planar Multibody Formations with Internal Forces
G11-148 Orbital Dynamics of "Smart-Dust" Devices with Solar Radiation Pressure and Drag
G11-084 Solar Sail Capabilities to Reach Elliptic Rectilinear Orbits
G11-126 Low-Thrust-Enabled Highly Non-Keplerian Orbits in Support of Future Mars Exploration
G11-114 Ion Beam Shepherd for Asteroid Deflection
G11-079 Targeting Ballistic Lunar Capture Trajectories Using Periodic Orbits
G11-017 Length Scaling in Spacecraft Dynamics
G11-059 Evolution of Periodic Orbits in the Sun–Mars System

Mission Trajectories (Earth and Interplanetary)

G11-007 Automated Generation of Symmetric Lunar Free-Return Trajectories
G11-025 Using Edelbaum's Method to Compute Low-Thrust Transfers with Earth-Shadow Eclipses
G11-018 Analytical Expressions that Characterize Propellantless Capture with Electrostatically Charged Spacecraft
G11-113 Quantitative Performance for Spacecraft Rendezvous Trajectory Safety
G11-132 Interplanetary Trajectories for Multiple Satellite-Aided Capture at Jupiter
G11-169 Optimal Lunar Orbit Insertion from a Variable Symmetric Free-Return Trajectory
G11-126 Low-Thrust-Enabled Highly Non-Keplerian Orbits in Support of Future Mars Exploration
G11-118 Applications of V-Infinity Leveraging Maneuvers to Endgame Strategies for Planetary Moon Orbiters
G11-076 Generation of Optimal Trajectories for Earth Hybrid Pole Sitters
G11-059 Evolution of Periodic Orbits in the Sun–Mars System
G11-084 Solar Sail Capabilities to Reach Elliptic Rectilinear Orbits
G11-108 High-Accuracy Trajectory Optimization for a Trans-Earth Lunar Mission
G11-179 Closed-Form Solution of the l1-Optimal Bi-Impulsive Coplanar Orbital Transfer Problem
G11-150 Optimal Low-Thrust Invariant Manifold Trajectories via Attainable Sets
G11-155 Optimal Control Problem for Low-Thrust Multiple Asteroid Tour Missions

Space Systems

G11-060 Survey of Highly Non-Keplerian Orbits with Low-Thrust Propulsion
G11-082 Ion Beam Shepherd for Contactless Space Debris Removal

Spacecraft Attitude Determination

G11-157 Spin-Axis Attitude Determination and Covariances in Local Sun–Earth Frame
G11-156 Solution Strategies for an Extension of Wahba's Problem to a Spinning Spacecraft
G11-048 Constrained Relative Attitude Determination for Two-Vehicle Formations
G11-032 Sparse Gauss–Hermite Quadrature Filter with Application to Spacecraft Attitude Estimation
G11-164 In-Orbit Estimation of Inertia and Momentum-Actuator Alignment Parameters

Spacecraft Sensor Systems

G11-024 Heuristic Pose Estimation of a Passive Target Using a Global Model

STRUCTURAL MECHANICS AND MATERIALS

Aeroelasticity and Control

G11-039 Model-Free Control Design for Multi-Input Multi-Output Aeroelastic System Subject to External Disturbance
G11-072 Analysis of Flexible Aircraft Dynamics Using Bifurcation Methods
G11-171 Cybernetic Approach to Assess Aircraft Handling Qualities

Dynamic Model Analysis

G11-130 Modeling Interactions Between Flexible Flapping-Wing Spars, Mechanisms, and Drive Motors

Flexible and Active Structures

G11-177 Simple Adaptive Control Applications to Large Flexible Structures
G11-093 Vibration Control Using Input Shaping and Adaptive Positive Position Feedback

Structural Finite Elements

G11-093 Vibration Control Using Input Shaping and Adaptive Positive Position Feedback

Chronological Index

G09-047E Erratum on Gust Energy Extraction for Mini and Micro Uninhabited Aerial Vehicles. Jack W. Langelaan, *Pennsylvania State University* (**32**, 2, p. 464) Erratum

G11-001 Merging of Air Traffic Flows. Andre Michelin, Moshe Idan, and Jason Speyer, *University of California, Los Angeles* (**34**, 1, p. 13) Article

G11-002 Unmanned Aerial Vehicle Optimal Cooperative Obstacle Avoidance in a Stochastic Dynamic Environment. Carole G. Prévost and André Desbiens, *Université Laval*, Canada; Eric Gagnon, *Defence Research and Development*, Canada; and Daniel Hodouin, *Université Laval*, Canada (**34**, 1, p. 29) Article

G11-003 Reference Management for Fault-Tolerant Model Predictive Control. Fabio A. de Almeida, *Grupo Especial de Ensaios em Voo*, Brazil (**34**, 1, p. 44) Article based on AIAA Paper 2010-7704

G11-004 Susceptibility of F/A-18 Flight Controllers to the Falling-Leaf Mode: Linear Analysis. Abhijit Chakraborty, Peter Seiler, and Gary J. Balas, *University of Minnesota* (**34**, 1, p. 57) Article based on AIAA Paper 2009-5675

G11-005 Susceptibility of F/A-18 Flight Controllers to the Falling-Leaf Mode: Nonlinear Analysis. Abhijit Chakraborty, Peter Seiler, and Gary J. Balas, *University of Minnesota* (**34**, 1, p. 73) Article based on AIAA Paper 2009-5675

G11-006 Identification of Multimodal Pilot Models Using Ramp Target and Multisine Disturbance Signals. D. M. Pool, P. M. Zaal, M. M. van Paassen, and M. Mulder, *Delft University of Technology*, The Netherlands (**34**, 1, p. 86) Article

G11-007 Automated Generation of Symmetric Lunar Free-Return Trajectories. Mark Jesick and Cesar Ocampo, *University of Texas at Austin* (**34**, 1, p. 98) Article

G11-008 Robust Roll Autopilot Design for Tactical Missiles. S. E. Talole, *Defence Institute of Advanced Technology*, India; A. A. Godbole, *Defence Institute of Advanced Technology, Girinagar*, India; J. P. Kolhe, *Defence Institute of Advanced Technology*, India; and S. B. Phadke, *College of Engineering Pune*, India (**34**, 1, p. 107) Article

G11-009 Passivity-Based Control of Rigid Electrodynamic Tether. Martin B. Larsen and Mogens Blanke, *Technical University of Denmark*, Denmark (**34**, 1, p. 118) Article

G11-010 Improved Shaping Approach to the Preliminary Design of Low-Thrust Trajectories. D. M. Novak, *University of Glasgow*, Britain; and M. Vasile, *University of Strathclyde*, Britain (**34**, 1, p. 128) Article

G11-011 Continuous-Time Kalman Filtering with Implicit Discrete Measurement Times. Shan Mohiuddin, *Charles Stark Draper Laboratory*; and Mark L. Psiaki, *Cornell University* (**34**, 1, p. 148) Article based on AIAA Paper 2009-6084

G11-012 Piloted Simulation Study Comparing Classical, H-Infinity, and Linear Parameter-Varying Control Methods. Daniel J. Alvarez, *Systems Technology, Inc.*; and Bei Lu, *California State University* (**34**, 1, p. 164) Article based on AIAA Paper 2010-7940

G11-013 Multivehicle Coordination in an Estimated Time-Varying Flowfield. Cameron Peterson and Derek A. Paley, *University of Maryland* (**34**, 1, p. 177) Article

G11-014 Equitable Aircraft Noise-Abatement Departure Procedures. Xavier Prats, Vicenç Puig, and Joseba Quevedo, *Technical University of Catalonia*, Spain (**34**, 1, p. 192) Article based on AIAA Paper 2009-6939

G11-015 Dynamics and Control of a Biomimetic Vehicle Using Biased Wingbeat Forcing Functions. Michael W. Oppenheimer, David B. Doman, and David O. Sigthorsson, *U.S. Air Force Research Laboratory* (**34**, 1, p. 204) Article

G11-016 Trajectory Generation for Aircraft Avoidance Maneuvers Using Online Optimization. Rushen B. Patel and Paul J. Goulart, *Imperial College London*, Britain (**34**, 1, p. 218) Article

G11-017 Length Scaling in Spacecraft Dynamics. Justin A. Atchison and Mason A. Peck, *Cornell University* (**34**, 1, p. 231) Article

G11-018 Analytical Expressions that Characterize Propellantless Capture with Electrostatically Charged Spacecraft. Joseph W. Gangestad, George E. Pollock, and James M. Longuski, *Purdue University* (**34**, 1, p. 247) Article

G11-019 Coulomb Control of Nonequilibrium Fixed Shape Triangular Three-Vehicle Cluster. Shuquan Wang and Hanspeter Schaub, *University of Colorado* (**34**, 1, p. 259) Article

G11-020 Density Functions for Mesh Refinement in Numerical Optimal Control. Yiming Zhao and Panagiotis Tsiotras, *Georgia Institute of Technology* (**34**, 1, p. 271) Article based on AIAA Paper 2009-2019

G11-021 Stability Limits of Spinning Missiles with Attitude Autopilot. Xiaoyong Yan, Shuxing Yang, and Fenfen Xiong, *Beijing Institute of Technology*, China (PRC) (**34**, 1, p. 278) Technical Note

G11-022 Negative-*g* Trajectory Generation Using Quaternion-Based Inverse Dynamics. Rick G. Drury, Antonios Tsourdos, and Alastair K. Cooke, *Cranfield University*, Great Britain (**34**, 1, p. 283) Technical Note based on AIAA Paper 2010-7816

G11-023 Canonical Solution of Two-Point Boundary-Value Problems. Qifeng Chen and Jinhai Dai, *National University of Defense Technology*, China (PRC) (**34**, 1, p. 287) Technical Note

G11-024 Heuristic Pose Estimation of a Passive Target Using a Global Model. D. S. Wokes and P. L. Palmer, *Surrey Space Centre*, Britain (**34**, 1, p. 293) Technical Note

G11-025 Using Edelbaum's Method to Compute Low-Thrust Transfers with Earth-Shadow Eclipses. Craig A. Kluever, *University of Missouri* (**34**, 1, p. 300) Technical Note

G11-026 Reactive Collision Avoidance of Using Nonlinear Geometric and Differential Geometric Guidance. Anusha Mujumdar and Radhakant Padhi, *Indian Institute of Science*, India (**34**, 1, p. 303) Technical Note based on AIAA Paper 2010-8315

G11-027 Analytic Development of a Reference Trajectory for Skip Entry. Eduardo Garcia-Llama, *GB Tech, Inc.* (**34**, 1, p. 311) Technical Note based on AIAA Paper 2007-6897

G11-028 Precision Attitude Stabilization: Incorporating Rise and Fall Times in Gas-Based Thrusters. Srikant Sukumar and Maruthi R. Akella, *University of Texas at Austin* (**34**, 1, p. 317) Technical Note

G11-029 Hypersonic State Estimation Using the Frobenius–Perron Operator. Parikshit Dutta and Raktim Bhattacharya, *Texas A&M University* (**34**, 2, p. 325) Article

G11-030 Lyapunov Differential Equation Approach to Elliptical Orbital Rendezvous with Constrained Controls. Bin Zhou, *Harbin Institute of Technology*, China (PRC); Zongli Lin, *University of Virginia*; and Guang-Ren Duan, *Harbin Institute of Technology*, China (PRC) (**34**, 2, p. 345) Article

G11-031 Nonlinear Charge Control for a Collinear Fixed-Shape Three-Craft Equilibrium. Shuquan Wang and Hanspeter Schaub, *University of Colorado at Boulder* (**34**, 2, p. 359) Article based on AIAA Paper 2010-7995

G11-032 Sparse Gauss–Hermite Quadrature Filter with Application to Spacecraft Attitude Estimation. Bin Jia, Ming Xin, and Yang Cheng, *Mississippi State University* (**34**, 2, p. 367) Article

G11-033 Load Balancing in Control Allocation. Marc Bodson, *University of Utah*; and Susan A. Frost, *NASA Ames Research Center* (**34**, 2, p. 380) Article based on AIAA Paper 2009-6270

G11-034 Adaptive Nonlinear Huber-Based Navigation for Rendezvous in Elliptical Orbit. Christopher D. Karlgaard, *Analytical Mechanics Associates, Inc.*; and Hanspeter Schaub, *University of Colorado at Boulder* (**34**, 2, p. 388) Article based on AIAA Paper 2010-7665

G11-035 Tactical Conflict Detection in Terminal Airspace.. Huabin Tang and John E. Robinson, *NASA Ames Research Center*; and Dallas G. Denery, *University of California, Santa Cruz* (**34**, 2, p. 403) Article

G11-036 Optimal Cooperative Pursuit and Evasion Strategies Against a Homing Missile. Tal Shima, *Technion–Israel Institute of Technology*, Israel (**34**, 2, p. 414) Article

G11-037 Parameter Estimation of Aircraft Dynamics via Unscented Smoother with Expectation-Maximization Algorithm. Nobuhiro Yokoyama, *National Defense Academy*, Japan (**34**, 2, p. 426) Article

G11-038 Practical Stochastic Optimal Guidance Law for Bounded Acceleration Missiles. G. Hexner, *RAFAEL, Advanced Defense Systems, Ltd.*, Israel; and A. W. Pila, *Israel Military Industries, Ltd.*, Israel (**34**, 2, p. 437) Article based on AIAA Paper 2010-8054

G11-039 Model-Free Control Design for Multi-Input Multi-Output Aeroelastic System Subject to External Disturbance. Z. Wang and A. Behal, *University of Central Florida*; and P. Marzocca, *Clarkson University* (**34**, 2, p. 446) Article

G11-040 Dispersion Analysis in Hypersonic Flight During Planetary Entry Using Stochastic Liouville Equation. Abhishek Halder and Raktim Bhattacharya, *Texas A&M University* (**34**, 2, p. 459) Article

G11-041 Improved Computation of Balancing Transformations for Aeroservoelastic Models via Time Scale Conversion. Daniel C. Hammerand, James M. Gariffo, and Kevin M. Roughen, *M4 Engineering, Inc.* (**34**, 2, p. 475) Article based on AIAA Paper 2010-2947

G11-042 Intercept-Angle Guidance. Tal Shima, *Technion–Israel Institute of Technology*, Israel (**34**, 2, p. 484) Article based on AIAA Paper 2007-6782

G11-043 Fuel Optimization for Continuous-Thrust Orbital Rendezvous with Collision Avoidance Constraint. Richard Epenoy, *Centre National d'Etudes Spatiales*, France (**34**, 2, p. 493) Article

G11-044 Spectral Decomposition of Orbital Tori. Ralph E. Bordner and William E. Wiesel, *Air Force Institute of Technology* (**34**, 2, p. 504) Article

G11-045 Kill Vehicle Guidance and Control Sizing For Boost-Phase Intercept. Paul Zarchan, *Lincoln Laboratory, Massachusetts Institute of Technology* (**34**, 2, p. 513) Article

G11-046 Line-of-Sight Interceptor Guidance for Defending an Aircraft. Ashwini Ratnoo and Tal Shima, *Technion–Israel Institute of Technology*, Israel (**34**, 2, p. 522) Article

G11-047 Attitude Stabilization with Unknown Bounded Delay in Feedback Control Implementation. Apurva A. Chunodkar and Maruthi R. Akella, *University of Texas at Austin* (**34**, 2, p. 533) Article based on AIAA Paper 2009-5801

G11-048 Constrained Relative Attitude Determination for Two-Vehicle Formations. Richard Linares and John L. Crassidis, *University at Buffalo, State University of New York*; and Yang Cheng, *Mississippi State University* (**34**, 2, p. 543) Article based on AIAA Paper 2009-5882

G11-049 Optimal Rotation Sequences in Presence of Constraints on Admissible Rotation Axes. Giulio Avanzini and Luca Berardo, *Politecnico di Torino*, Italy; Fabrizio Giulietti, *University of Bologna*, Italy; and Edmondo A. Minisci, *University of Glasgow*, Great Britain (**34**, 2, p. 554) Article

G11-050 Decentralized Geolocation and Bias Estimation for Uninhabited Aerial Vehicles with Articulating Cameras. William W. Whitacre and Mark E. Campbell, *Cornell University* (**34**, 2, p. 564) Article based on AIAA Paper 2009-6220

G11-051 Engagement Tactics for Two Missiles Against an Optimally Maneuvering Aircraft. Fumiaki Imado, *Shinshu University*, Japan; and Takeshi Kuroda, *Mitsubishi Electric Corporation*, Japan (**34**, 2, p. 574) Article

G11-052 Family of Local Solutions in a Missile-Aircraft Differential Game. Fumiaki Imado, *Shinshu University*, Japan; and Takeshi Kuroda, *Mitsubishi Electric Corporation*, Japan (**34**, 2, p. 583) Article

G11-053 Theory and Flight-Test Validation of a Concurrent-Learning Adaptive Controller. Girish V. Chowdhary and Eric N. Johnson, *Georgia Institute of Technology* (**34**, 2, p. 592) Article

G11-054 Safe Zone for Closely Spaced Parallel Approaches. Steven J. Landry and Alfred Lynam, *Purdue University* (**34**, 2, p. 608) Technical Note

G11-055 Experimental Verification of Periodic Libration of Tethered Satellite System in Elliptic Orbit. Hirohisa Kojima and Yoshiyasu Fukukawa, *Tokyo Metropolitan University*, Japan; and Pavel M. Trivailo, *Royal Melbourne Institute of Technology*, Australia (**34**, 2, p. 614) Technical Note based on AIAA Paper 2009-5815

G11-056 Analysis of Insect-Inspired Wingstroke Kinematic Perturbations for Longitudinal Control. J. S. Humbert and Imraan A. Faruque, *University of Maryland* (**34**, 2, p. 618) Technical Note

G11-057 Gain Scheduled Control: Switched Polytopic System Approach. Yanze Hou, Qing Wang, and Chaoyang Dong, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**34**, 2, p. 623) Technical Note

G11-058 Costate Approximation and Comparisons Between Improved and Classical Indirect Trajectory Optimization. Roger L. Barron, *Independent Consultant* (**34**, 2, p. 629) Technical Note

G11-059 Evolution of Periodic Orbits in the Sun–Mars System. Pooja Dutt, *Vikram Sarabhai Space Center*, India; and R K Sharma, *Vikram Sarabhai Space Centre*, India (**34**, 2, p. 635) Technical Note

G11-060 Survey of Highly Non-Keplerian Orbits with Low-Thrust Propulsion. Robert McKay, Malcolm Macdonald, James Biggs, and Colin McInnes, *University of Strathclyde*, Great Britain (**34**, 3, p. 645) Survey Paper

G11-061 Longitudinal Flight Dynamics of Bioinspired Ornithopter Considering Fluid–Structure Interaction. Jun-Seong Lee and Joong-Kwan Kim, *Korea Advanced Institute of Science and Technology*, Korea (ROK); Dae-Kwan Kim, *Korea Aerospace Research Institute* Korea (ROK); and Jae-Hung Han, *Korea Advanced Institute of Science and Technology*, Korea (ROK) (**34**, 3, p. 667) Article based on AIAA Paper 2010-8237

G11-062 Approach Guidance with Double-Line-of-Sight Measuring Navigation Constraint for Autonomous Rendezvous. . Tong Chen and Shijie Xu, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**34**, 3, p. 678) Article

G11-063 Roll Orientation Estimator for Smart Projectiles Using Thermopile Sensors. Jonathan Rogers and Mark Costello, *Georgia Institute of Technology*; and David Hepner, *U.S. Army Research Laboratory* (**34**, 3, p. 688) Article

G11-064 Optimal Nonlinear Feedback Control Design Using a Waypoint Method. Rajnish Sharma, *University of Alabama*; and Srinivas R. Vadali and John E. Hurtado, *Texas A&M University* (**34**, 3, p. 698) Article

G11-065 Libration Synchronization Control of Clustered Electrodynamic Tether System Using Kuramoto Model. Hirohisa Kojima and Hiroki Iwashima, *Tokyo Metropolitan University*, Japan; and Pavel M. Trivailo, *Royal Melbourne Institute of Technology*, Australia (**34**, 3, p. 706) Article based on AIAA Paper 2010-8350

G11-066 Autonomous Exploration of a Wind Field with a Gliding Aircraft. Nicholas R. Lawrance and Salah Sukkarieh, *University of Sydney*, Australia (**34**, 3, p. 719) Article based on AIAA Paper 2010-8032

G11-067 Kinetic State Tracking for a Class of Singularly Perturbed Systems. Anshu Siddarth and John Valasek, *Texas A&M University* (**34**, 3, p. 734) Article based on AIAA Paper 2010-8159

G11-068 Time-of-Arrival Taxi Conformance Monitoring for Surface Operations. Qian Zheng and Yiyuan J. Zhao, *University of Minnesota*; and Brian J. Capozzi, *Mosaic ATM, Inc.* (**34**, 3, p. 750) Article based on AIAA Paper 2010-7544

G11-069 Cooperative Differential Games Strategies for Active Aircraft Protection from a Homing Missile. Andrey Perelman and Tal Shima, *Technion–Israel Institute of Technology*, Israel; and Ilan Rusnak, *RAFAEL, Advanced Defense Systems, Ltd.*, Israel (**34**, 3, p. 761) Article

G11-070 Explicit Frequency-Shaped Coning Algorithms For Pseudoconing Environments. Paul G. Savage, *Strapdown Associates, Inc.* (**34**, 3, p. 774) Article

G11-071 Self-Organizing Radial Basis Function Networks for Adaptive Flight Control. Praveen Shankar, *Arizona State University*; Rama K. Yedavalli, *Ohio State University*; and John J. Burken, *NASA Dryden Flight Research Center* (**34**, 3, p. 783) Article

G11-072 Analysis of Flexible Aircraft Dynamics Using Bifurcation Methods. Nadjib M. Baghdadi, Mark H. Lowenberg, and A. T. Isikveren, *University of Bristol*, Great Britain (**34**, 3, p. 795) Article based on AIAA Paper 2010-2950

G11-073 Rock-Around Orbits. Scott K. Bourgeois and Daniele Mortari, *Texas A&M University* (**34**, 3, p. 810) Article based on AIAA Paper 2009-343

G11-074 Orbital Targeting Using Reduced Eccentric Anomaly Low-Thrust Coefficients. Jennifer S. Hudson, *University of Michigan*; and Daniel J. Scheeres, *University of Colorado* (**34**, 3, p. 820) Article

G11-075 Feedback Control of the National Airspace System. Jerome Le Ny, *University of Pennsylvania*; and Hamsa Balakrishnan, *Massachusetts Institute of Technology* (**34**, 3, p. 832) Article

G11-076 Generation of Optimal Trajectories for Earth Hybrid Pole Sitters. Matteo Ceriotti and Colin R. McInnes, *University of Strathclyde*, Great Britain (**34**, 3, p. 847) Article

G11-077 Suboptimal Midcourse Guidance of Interceptors for High-Speed Targets with Alignment Angle Constraint. Prasiddha Nath Dwivedi and Abhijit Bhattacharya, *Defence Research and Development Organization*, India; and Radhakant Padhi, *Indian Institute of Science*, India (**34**, 3, p. 860) Article

G11-078 Time-Efficient Angular Steering Laws for Rigid Satellite. Dov Verbin and Vaios J. Lappas, *University of Surrey*, Great Britain; and Joseph Z. Ben-Asher, *Technion–Israel Institute of Technology*, Israel (**34**, 3, p. 878) Article

G11-079 Targeting Ballistic Lunar Capture Trajectories Using Periodic Orbits. Paul R. Griesemer and Cesar Ocampo, *University of Texas at Austin*; and D. S. Cooley, *NASA Goddard Spaceflight Center* (**34**, 3, p. 893) Article

G11-080 Orbit Determination with Improved Covariance Fidelity, Including Sensor Measurement Biases. Michael E. Hough, *Raytheon Company, Inc.* (**34**, 3, p. 903) Technical Note

G11-081 Dynamic Systems Approach to the Lander Descent Problem. Y. H. Shang, K. Uldall Kristiansen, and P. L. Palmer, *University of Surrey*, Great Britain (**34**, 3, p. 911) Technical Note

G11-082 Ion Beam Shepherd for Contactless Space Debris Removal. Claudio Bombardelli and Jesus Peláez, *Technical University of Madrid*, Spain (**34**, 3, p. 916) Technical Note

G11-083 Solution Based on Dynamical Approach for Multiple-Revolution Lambert Problem. P. V. Arlulkar and S. D. Naik, *Defence Institute of Advanced Technology*, India (**34**, 3, p. 920) Technical Note

G11-084 Solar Sail Capabilities to Reach Elliptic Rectilinear Orbits. Alessandro A. Quarta and Giovanni Mengali, *University of Pisa*, Italy (**34**, 3, p. 923) Technical Note

G11-085 Fault-Tolerant Attitude Control for Spacecraft Under Loss of Actuator Effectiveness. Qinglei Hu and Bing Xiao, *Harbin Institute of Technology*, China (PRC); and Youmin Zhang, *Concordia University*, Canada (**34**, 3, p. 927) Technical Note

G11-086 Derivative-Free Model Reference Adaptive Control. Tansel Yucelen and Anthony J. Calise, *Georgia Institute of Technology* (**34**, 4, p. 933) Article based on AIAA Paper 2010-7769

G11-087 Accounting for State Uncertainty in Collision Avoidance. James P. Chryssanthacopoulos and Mykel J. Kochenderfer, *Lincoln Laboratory, Massachusetts Institute of Technology* (**34**, 4, p. 951) Article

G11-088 Improved Dynamic Generation of Operationally Acceptable Reroutes Using Network Optimization. Christine P. Taylor and Craig Wanke, *MITRE Corporation* (**34**, 4, p. 961) Article based on AIAA Paper 2010-8077

G11-089 Investigation of Practical Flight Envelope Protection Systems for Small Aircraft. W. Falkena, C. Borst, Q.P. Chu, and J.A. Mulder, *Delft University of Technology*, The Netherlands (**34**, 4, p. 976) Article based on AIAA Paper 2010-7701

G11-090 Artificial-Immune-System-Based Aircraft Failure Evaluation over Extended Flight Envelope. Hever Moncayo, Mario G. Perhinschi, and Jennifer Davis, *West Virginia University* (**34**, 4, p. 989) Article based on AIAA Paper 2010-8038

G11-091 Energy-Based Long-Range Path Planning for Soaring-Capable Unmanned Aerial Vehicles. Anjan Chakrabarty and Jack W. Langelaan, *Pennsylvania State University* (**34**, 4, p. 1002) Article based on AIAA Paper 2010-8033

G11-092 Wind Field Estimation for Small Unmanned Aerial Vehicles. Jack W. Langelaan, *Pennsylvania State University*; Nicholas Alley and James Neidhoefer, *Area-I. Inc.* (**34**, 4, p. 1016) Article based on AIAA Paper 2010-8177

G11-093 Vibration Control Using Input Shaping and Adaptive Positive Position Feedback. Ryan Orszulik and Jinjun Shan, *York University*, Canada (**34**, 4, p. 1031) Article based on AIAA Paper 2010-8147

G11-094 Gain Scheduling with Guardian Maps for Longitudinal Flight Control. David Saussié and Lahcen Saydy, *École Polytechnique de Montréal*, Canada; Ouassima Akhrif, *École de Technologie Supérieure*, Canada; and Caroline Bérard, *Institut Supérieur de l'Aéronautique et de l'Espace*, France (**34**, 4, p. 1045) Article

G11-095 Bounds on the Root-Mean-Square Miss of Radar-Guided Missiles Against Sinusoidal Target Maneuvers. Ilan Rusnak, *RAFAEL, Advanced Defense Systems, Ltd.*, Israel (**34**, 4, p. 1060) Article

G11-096 Optimal Formation Design for Magnetospheric Multiscale Mission Using Differential Orbital Elements. Christopher W. Roscoe, Srinivas R. Vadali, Kyle T. Alfriend, and Uri P. Desai, *Texas A&M University* (**34**, 4, p. 1070) Article based on AIAA Paper 2010-7958

G11-097 Flight Control Experiment of Multipurpose-Aviation-Laboratory-alpha In-Flight Simulator. Masayuki Sato, *Japan Aerospace Exploration Agency*, Japan; and Atsushi Satoh, *Iwate University*, Japan (**34**, 4, p. 1081) Article

G11-098 Approximate Analytical Solutions to Optimal Reconfiguration Problems in Perturbed Satellite Relative Motion. Sangjin Lee and Sang-Young Park, *Yonsei University*, Korea (ROK) (**34**, 4, p. 1097) Article

G11-099 Trajectory Prediction for Light Aircraft. Urban Maeder, Manfred Morari, and Thomas I. Baumgartner, *ETH Zurich*, Switzerland (**34**, 4, p. 1112) Article

G11-100 Thrusters Pairing Guidelines for Trajectory Corrections of Projectiles. Daniel Corriveau, *Canadian Department of National Defence*, Canada; Pierre Wey and Claude Berner, *ISL, French-German Research Institute of Saint-Louis*, France (**34**, 4, p. 1120) Article

G11-101 Perturbation Theory for Hamilton's Principal Function. O. Muñoa Peñagaricano, *University of Deusto*, Spain; and Daniel J. Scheeres, *University of Colorado* (**34**, 4, p. 1129) Article

G11-102 Control Evaluations of Semiactive Fluid-Elastomeric Helicopter Lag Damper. Curt Kothera, *Techno-Sciences Inc.*; Norman M. Wereley and Grum Ngatu, *University of Maryland* (**34**, 4, p. 1143) Article

G11-103 Kinematic Analysis and Control Design for a Nonplanar Multirotor Vehicle. Bill Crowther, Alexander Lanzon, Martin Maya-Gonzalez, and David Langkamp, *University of Manchester*, Great Britain (**34**, 4, p. 1157) Article

G11-104 Conflict Resolution in Converging Air Traffic Using Trajectory Patterns. Alfonso Valenzuela and Damián Rivas, *Universidad de Sevilla*, Spain (**34**, 4, p. 1172) Article based on AIAA Paper 2009-7022

G11-105 Stability Properties and Cross-Coupling Performance of the Control Allocation Scheme CAPIO. Yildiray Yildiz, *University of California, Santa Cruz*; and Ilya Kolmanovsky, *University of Michigan* (**34**, 4, p. 1190) Article based on AIAA Paper 2010-3474

G11-106 Time-Optimal Reorientation of a Spacecraft Using an Inverse Dynamics Optimization Method. George A. Boyarko, Marcello Romano, and Oleg Yakimenko, *Naval Postgraduate School* (**34**, 4, p. 1197) Article

G11-107 Feedback Control with Nominal Inputs for Agile Satellites Using Control Moment Gyros. Y. Kusuda and M. Takahashi, *Keio University*, Japan (**34**, 4, p. 1209) Article based on AIAA Paper 2009-6205

G11-108 High-Accuracy Trajectory Optimization for a Trans-Earth Lunar Mission. Hui Yan and Qi Gong, *University of California, Santa Cruz*; Chan D. Park and I. Michael Ross, *Naval Postgraduate School*; and Christopher N. D'Souza, *NASA Johnson Space Center* (**34**, 4, p. 1219) Article

G11-109 Automating the Process of Terminal Area Node-Link Model Generation. Hak-Tae Lee, *University of California, Santa Cruz*; and Thomas F. Romer, *NASA Ames Research Center* (**34**, 4, p. 1228) Article based on AIAA Paper 2008-7101

G11-110 Optimal Rendezvous Trajectories of a Controlled Spacecraft and a Tumbling Object. George Boyarko, Oleg Yakimenko, and Marcello Romano, *Naval Postgraduate School* (**34**, 4, p. 1239) Article based on AIAA Paper 2009-5669

G11-111 Minimum-Cost Cruise at Constant Altitude of Commercial Aircraft Including Wind Effects. Antonio Franco and Damián Rivas, *University of Seville*, Spain (**34**, 4, p. 1253) Technical Note

G11-112 Globally Stabilizing Proportional-Integral-Derivative Control Laws for Rigid-Body Attitude Tracking. Jingya Su and Kai-Yuan Cai, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**34**, 4, p. 1260) Technical Note

G11-113 Quantitative Performance for Spacecraft Rendezvous Trajectory Safety. Ya-zhong Luo, Li-bo Liang, Hua Wang, and Guo-jin Tang, *National University of Defense Technology*, China (PRC) (**34**, 4, p. 1264) Technical Note based on AIAA Paper 2010-7662

G11-114 Ion Beam Shepherd for Asteroid Deflection. Claudio Bombardelli and Jesus Peláez, *Universidad Politécnica de Madrid*, Spain (**34**, 4, p. 1270) Technical Note

G11-115 Traveling Salesman Problem for a Class of Carrier-Vehicle Systems. Emanuele Garone, *Université Libre de Bruxelles*, Belgium; Roberto Naldi, *University of Bologna*, Italy; and Alessandro Casavola, *University of Calabria*, Italy (**34**, 4, p. 1272) Technical Note

G11-116 Decentralized Robust Adaptive Control for Attitude Synchronization Under Directed Communication Topology. Baolin Wu and Danwei Wang, *Nanyang Technological University*, Singapore (ROS); and Eng Kee Poh, *DSO National Laboratories*, Singapore (ROS) (**34**, 4, p. 1276) Technical Note

G11-117 Absolute Orbit and Gravity Determination Using Relative Position Measurements Between Two Satellites. Mark L. Psiaki, *Cornell University* (**34**, 5, p. 1285) Article based on AIAA Paper 2007-6661

G11-118 Applications of *V*-Infinity Leveraging Maneuvers to Endgame Strategies for Planetary Moon Orbiters. Ryan C. Woolley and Daniel J. Scheeres, *University of Colorado* (**34**, 5, p. 1298) Article

G11-119 Experimental Validation of *L*1 Adaptive Control: The Rohrs Counterexample in Flight. Vladimir Dobrokhodov, Isaac Kaminer, and Ioannis Kitsios, *Naval Postgraduate School*; Enric Xargay and Naira Hovakimyan, *University of Illinois at Urbana–Champaign*; Chengyu Cao, *University of Connecticut*; Irene M. Gregory, *NASA Langley Research Center*; and Lena Valavani, *Hellenic Space Systems, S.A.*, Greece (**34**, 5, p. 1311) Article based on AIAA Paper 2009-6188

G11-120 Optimal Pulse Strategies for Relative Orbit Transfer Along a Circular Orbit. Ryo Jifuku, Akira Ichikawa, and Mai Bando, *Kyoto University*, Japan (**34**, 5, p. 1329) Article

G11-121 Link Transmission Model for Air Traffic Flow Management. Yi Cao and Dengfeng Sun, *Purdue University* (**34**, 5, p. 1342) Article

G11-122 Cooperative Target Localization with a Communication-Aware Unmanned Aircraft System. Maciej Stachura and Eric W. Frew, *University of Colorado* (**34**, 5, p. 1352) Article based on AIAA Paper 2010-8423

G11-123 Linear Time-Varying Passivity-Based Attitude Control Employing Magnetic and Mechanical Actuation. James Richard Forbes and Christopher John Damaren, *University of Toronto*, Canada (**34**, 5, p. 1363) Article based on AIAA Paper 2010-7900

G11-124 Runway Operations Optimization in the Presence of Uncertainties. Gustaf Solveling, *Georgia Institute of Technology*; Senay Solak, *University of Massachusetts*; and John-Paul Clarke and Ellis Johnson, *Georgia Institute of Technology* (**34**, 5, p. 1373) Article based on AIAA Paper 2010-9252

G11-125 Constant-Optic-Flow Lunar Landing: Optimality and Guidance. Dario Izzo, Nicolas Weiss, and Tobias Seidl, *ESA*, The Netherlands (**34**, 5, p. 1383) Article

G11-126 Low-Thrust-Enabled Highly Non-Keplerian Orbits in Support of Future Mars Exploration. Malcolm Macdonald, Robert J. McKay, and Massimiliano Vasile, *University of Strathclyde*, Great Britain; Francois Bosquillon de Frescheville, *ESA*, Germany; James Biggs and Colin McInnes, *University of Strathclyde*, Great Britain (**34**, 5, p. 1396) Article

G11-127 Ornithopter Control with Periodic Infinite Horizon Controllers. John Dietl and Ephrahim Garcia, *Cornell University* (**34**, 5, p. 1412) Article

G11-128 Artificial-Immune-System-Based Detection Scheme for Aircraft Engine Failures. Mario G. Perhinschi, Jaclyn Porter, Hever Moncayo, Jennifer Davis, and W. Scott Wayne, *West Virginia University* (**34**, 5, p. 1423) Article based on AIAA Paper 2010-7740

G11-129 Stability of Electrodynamic Tethers in a Three-Body System. D. Zanutto, D. Curreli, and E.C. Lorenzini, *University of Padova*, Italy (**34**, 5, p. 1441) Article

G11-130 Modeling Interactions Between Flexible Flapping-Wing Spars, Mechanisms, and Drive Motors. David B. Doman, *U.S. Air Force Research Laboratory*; Chinpei Tang, *University of Texas at Dallas*; and Sean Regisford, *U.S. Air Force Research Laboratory* (**34**, 5, p. 1457) Article based on AIAA Paper 2011-6389

G11-131 Rigid-Body Attitude Tracking with Vector Measurements and Unknown Gyro Bias. Travis H. Mercker and Maruthi R. Akella, *University of Texas at Austin* (**34**, 5, p. 1474) Article

G11-132 Interplanetary Trajectories for Multiple Satellite-Aided Capture at Jupiter. Alfred E. Lynam and James M. Longuski, *Purdue University* (**34**, 5, p. 1485) Article based on AIAA Paper 2010-8254

G11-133 Multivariable Adaptive Control of NASA Generic Transport Aircraft Model with Damage. Jiaxing Guo and Gang Tao, *University of Virginia*; and Yu Liu, *Cummins Technical Center* (**34**, 5, p. 1495) Article based on AIAA Paper 2010-8014

G11-134 Joint Metering and Conflict Resolution in Air Traffic Control. Jerome Le Ny and George J. Pappas, *University of Pennsylvania* (**34**, 5, p. 1507) Article

G11-135 Robust Control of Flight Simulator Motion Base. Mauricio Becerra-Vargas and Eduardo M. Belo, *University of São Paulo*, Brazil (**34**, 5, p. 1519) Article based on AIAA Paper 2009-5921

G11-136 Modeling Wide-Frequency-Range Pilot Equalization for Control of Aircraft Pitch Dynamics. D. M. Pool, P. M. T. Zaal, H. J. Damveld, M. M. van Paassen, J. C. van der Vaart, and M. Mulder, *Delft University of Technology*, The Netherlands (**34**, 5, p. 1529) Article

G11-137 Takagi–Sugeno Fuzzy Model-Based Flight Control and Failure Stabilization. Evan J. Butler, *Sterling Point Research*; Hua O. Wang, *Boston University*; and John J. Burken, *NASA Dryden Flight Research Center* (**34**, 5, p. 1543) Article based on AIAA Paper 2010-7736

G11-138 Fault-Tolerant Attitude Control for Flexible Spacecraft Without Angular Velocity Magnitude Measurement. Bing Xiao, *Harbin Institute of Technology*, China (PRC); Qinglei Hu and Youmin Zhang, *Concordia University*, Canada (**34**, 5, p. 1556) Technical Note

G11-139 Linear Parameter Varying Analysis of Switched Controllers for Attitude Control Systems. Jean-Marc Biannic and Clement Roos, *ONERA*, France; and Christelle Pittet, *Centre National d'Etudes Spatiales*, France (**34**, 5, p. 1561) Technical Note based on AIAA Paper 2010-7903

G11-140 Using Polynomial Optimization to Solve the Fuel-Optimal Linear Impulsive Rendezvous Problem. Denis Arzelier, Mounir Kara-Zaitri, and Christophe Louembet, *Universite de Toulouse*, France; and Akin Delibasi, *Yildiz Technical University*, Turkey (**34**, 5, p. 1567) Technical Note based on AIAA Paper 2010-7595

G11-141 Stochastic Approach to Robust Flight Control Design Using Hierarchy-Structured Dynamic Inversion. Jun'ichiro Kawaguchi and Tetsujiro Ninomiya, *Japan Aerospace Exploration Agency*, Japan; and Yoshikazu Miyazawa, *Kyushu University*, Japan (**34**, 5, p. 1573) Technical Note

G11-142 Aircraft Trajectory Optimization and Contrails Avoidance in the Presence of Winds. Banavar Sridhar, *NASA Ames Research Center*; Hok Ng, *University of California, Santa Cruz*; and Neil Chen, *NASA Ames Research Center* (**34**, 5, p. 1577) Technical Note based on AIAA Paper 2010-9139

G11-143 Static Solutions of the Hamilton–Jacobi–Bellman Equation for Circular Orbit Transfers. Iman Alizadeh and Benjamin Villac, *University of California, Irvine* (**34**, 5, p. 1584) Technical Note

G11-144 Generalized Nonlinear Complementary Attitude Filter. Kenneth J. Jensen, *Makani Power, Inc.* (**34**, 5, p. 1588) Technical Note

G11-145 Optimal Glideslope Guidance for Spacecraft Rendezvous. Renato Zanetti, *Charles Stark Draper Laboratory* (**34**, 5, p. 1593) Technical Note

G11-146 Reconfigurable Spacecraft Controller Design via Location-Scheduled Control. Matt Sorgenfrei and Sanjay S. Joshi, *University of California, Davis* (**34**, 5, p. 1598) Technical Note

G11-147 Adaptive Detection of Sensor Uncertainties and Failures. Jason O. Burkholder, *Barron Associates, Inc.*; and Gang Tao, *University of Virginia* (**34**, 6, p. 1605) Article based on AIAA Paper 2009-5889

G11-148 Orbital Dynamics of "Smart-Dust" Devices with Solar Radiation Pressure and Drag. Camilla Colombo and Colin McInnes, *University of Strathclyde*, Great Britain (**34**, 6, p. 1613) Article based on AIAA Paper 2010-7656

G11-149 Disturbance Rejection and Robust Least-Squares Control Allocation in Flight Control System. Lei Cui and Ying Yang, *Peking University*, China (PRC) (**34**, 6, p. 1632) Article

G11-150 Optimal Low-Thrust Invariant Manifold Trajectories via Attainable Sets. Giorgio Mingotti, *University of Paderborn*, Germany; Francesco Topputo and Franco Bernelli-Zazzera, *Politecnico di Milano*, Italy (**34**, 6, p. 1644) Article

G11-151 Novel Nonlinear Rendezvous Guidance Scheme Under Constraints on Thrust Direction. Shinji Mitani, *Japan Aerospace Exploration Agency*, Japan; and Hiroshi Yamakawa, *Kyoto University*, Japan (**34**, 6, p. 1656) Article

G11-152 Modeling Kite Flight Dynamics Using a Multibody Reduction Approach. S. G. C. de Groot, J. Breukels, R. Schmehl, and W. J. Ockels, *Delft University of Technology*, The Netherlands (**34**, 6, p. 1671) Article

G11-153 Autonomous Low-Earth-Orbit Station-Keeping with Electric Propulsion. Andrea Garulli and Antonio Giannitrapani, *Universita degli Studi di Siena*, Italy; and Mirko Leomanni and Fabrizio Scortecci, *Aerospazio Tecnologie s.r.l.*, Italy (**34**, 6, p. 1683) Article

G11-154 Dynamics and Control of Hose-Drogue Refueling Systems During Coupling. Kapseong Ro, Taeseung Kuk, and James W. Kamman, *Western Michigan University* (**34**, 6, p. 1694) Article based on AIAA Paper 2010-8400

G11-155 Optimal Control Problem for Low-Thrust Multiple Asteroid Tour Missions. Joris T. Olympio, *ESA*, The Netherlands (**34**, 6, p. 1709) Article

G11-156 Solution Strategies for an Extension of Wahba's Problem to a Spinning Spacecraft. Joanna C. Hinks and Mark L. Psiaki, *Cornell University* (**34**, 6, p. 1714) Article based on AIAA Paper 2008-6459

G11-157 Spin-Axis Attitude Determination and Covariances in Local Sun–Earth Frame. Jozef C. van der Ha, *Mission Design and Operations* (**34**, 6, p. 1720) Article

G11-158 Proportional Navigation Against Multiple Targets. Oren Gutman and Zalman J. Palmor, *Technion–Israel Institute of Technology*, Israel (**34**, 6, p. 1728) Article based on AIAA Paper 2010-8183

G11-159 Robust Height Control System Design for Sea-Skimming Missiles. Priyamvada K. S., Varghese Olikal, and S. E. Talole, *Defence Institute of Advanced Technology*, India; and S. B. Phadke, *College of Engineering*, India (**34**, 6, p. 1746) Article based on AIAA Paper 2010-8322

G11-160 Guidance and Control of a Projectile with Reduced Sensor and Actuator Requirements. Frank Fresconi, *U.S. Army Research Laboratory* (**34**, 6, p. 1757) Article

G11-161 Probabilistic Trajectory Prediction and Conflict Detection for Air Traffic Control. Weiyi Liu and Inseok Hwang, *Purdue University* (**34**, 6, p. 1779) Article

G11-162 Integrals of Motion for Planar Multibody Formations with Internal Forces.. Michael C. Norman and Mason A. Peck, *Cornell University* (**34**, 6, p. 1790) Article based on AIAA Paper 2010-7668

G11-163 Risk-Based Sensor Management for Integrated Detection and Estimation. Y. Wang and Islam Hussein, *Worcester Polytechnic Institute*; and R. S. Erwin, *U.S. Air Force Research Laboratory* (**34**, 6, p. 1797) Article

G11-164 In-Orbit Estimation of Inertia and Momentum-Actuator Alignment Parameters.. Michael C. Norman and Mason A. Peck, *Cornell University*; and Daniel J. O'Shaughnessy, *Johns Hopkins University, Applied Physics Laboratory* (**34**, 6, p. 1798) Article

G11-165 Small-Body Postrendezvous Characterization via Slow Hyperbolic Flybys. Yu Takahashi and D. J. Scheeres, *University of Colorado at Boulder* (**34**, 6, p. 1815) Article based on AIAA Paper 2010-244

G11-166 Momentum-Exchange-Impact-Damper-Based Shock Response Control for Planetary Exploration Spacecraft. Susumu Hara and Ryosuke Ito, *Nagoya University*, Japan; Masatsugu Otsuki, *Japan Aerospace Exploration Agency*, Japan; Yoji Yamada, *Nagoya University*, Japan; Takashi Kubota and Tatsuaki Hashimoto, *Japan Aerospace Exploration Agency*, Japan; and Hiroshi Matsuhisa and Keisuke Yamada, *Kyoto University*, Japan (**34**, 6, p. 1828) Article

G11-167 Gaussian Sum Filters for Space Surveillance: Theory and Simulations. Joshua T. Horwood, Nathan D. Aragon, and Aubrey B. Poore, *Numerica Corporation* (**34**, 6, p. 1839) Article

G11-168 Displaced Geostationary Orbit Design Using Hybrid Sail Propulsion. Jeannette Heiligers, Matteo Ceriotti, Colin R. McInnes, and James D. Biggs, *University of Strathclyde*, Great Britain (**34**, 6, p. 1852) Article

G11-169 Optimal Lunar Orbit Insertion from a Variable Symmetric Free-Return Trajectory. Mark Jesick and Cesar Ocampo, *University of Texas at Austin* (**34**, 6, p. 1867) Article based on AIAA Paper 2010-8388

G11-170 Extremum Seeking Based on Atmospheric Turbulence for Aircraft Endurance. James P. Krieger and Miroslav Krstic, *University of California, San Diego* (**34**, 6, p. 1876) Article

G11-171 Cybernetic Approach to Assess Aircraft Handling Qualities. H. J. Damveld, M. M. van Paassen, and M. Mulder, *Delft University of Technology*, The Netherlands (**34**, 6, p. 1886) Article

G11-172 Autonomous Three-Dimensional Formation Flight for a Swarm of Unmanned Aerial Vehicles. Derek J. Bennet and C. R. MacInnes, *University of Strathclyde*, Great Britain; and M. Suzuki and K. Uchiyama, *Nihon University*, Japan (**34**, 6, p. 1899) Article based on AIAA Paper 2009-5884

G11-173 Efficient Model Predictive Control for Aircraft. Peter W. Gibbens and Eran D. Medagoda, *University of Sydney*, Australia (**34**, 6, p. 1909) Technical Note

G11-174 Modified Singular-Direction Avoidance Steering for Control Moment Gyros. Tao Meng, *Zhejiang University*, China (PRC); and Saburo Matunaga, *Tokyo Institute of Technology*, Japan (**34**, 6, p. 1915) Technical Note

G11-175 Attitude Control of a Spacecraft with Single-Gimbal Variable-Speed Control Moment Gyroscope. Jaehyun Jin, *Sunchon National University*, South Korea; and Inseok Hwang, *Purdue University* (**34**, 6, p. 1920) Technical Note

G11-176 Enhancing Lambert Targeting Methods to Accommodate 180 Degree Orbital Transfers. Blair F. Thompson, *Odyssey Space Research* (**34**, 6, p. 1925) Technical Note

G11-177 Simple Adaptive Control Applications to Large Flexible Structures. Itzhak Barkana, *Barkana Consulting*, Israel; and Joseph Z. Ben-Asher, *Technion–Israel Institute of Technology*, Israel (**34**, 6, p. 1929) Technical Note

G11-178 Globally Asymptotic Stabilization of Spacecraft with Simple Saturated Proportional-Derivative Control. Yuxin Su and Chunhong Zheng, *Xidian University*, China (PRC) (**34**, 6, p. 1932) Technical Note

G11-179 Closed-Form Solution of the l1-Optimal Bi-Impulsive Coplanar Orbital Transfer Problem. Leonel Mazal and Pini Gurfil, *Technion–Israel Institute of Technology*, Israel (**34**, 6, p. 1936) Technical Note

Books Reviewed During 2011

L_1 Adaptive Control Theory: Guaranteed Robustness with Fast Adaptation, by N. Hovakimyan, and C. Cao Lena Valavani (**34**, 4, p. 1283); reviewed by Lena Valavani, *Hellenic Space Systems, S.A.*

Cooperative Path Planning of Unmanned Aerial Vehicles, by Antonios Tsourdos, Brian White, and Madhavan Shanmugavel (**34**, 5, p. 1601); reviewed by Vladimir Dobrokhodov, *Naval Postgraduate School*
